

# Tomáš Javorský

## About Me

I'm an IT developer interested in solving problems with software. In the past, I have worked in different IT fields, but I currently focus on front end development in React and its ecosystem. I have received a Master's degree in Computer Science, however, most of my skills are self taught. I am a fast learner and my proficiency in various programming fields together with skill in 2D and 3D graphical software makes me a very versatile asset to any team.

## Education

Master's degree in Service Science,  
Management, and Engineering  
Faculty of Informatics Masaryk University - 2018  
Thesis: Body Transfer Illusion in VR - <https://is.muni.cz/th/y73cq/>

## Experience
